Auto365 Installation

Install from the USB **OR** download the latest files from: www.atttraining.com/auto and run ATTSetup.exe (you must unzip the setup program before running the download). The following notes are presented at the start of the setup routine:

SETUP: *This setup routine will install the program in:*

C:\Automotive Technician Training (this is the best option but you can change it).

NETWORK MANAGERS: *The program can be installed on a shared network drive and then a short cut to ATT.exe created on client desktops. Please open the folder \Support and read the content of reg.inf for a way to prevent remote machines requesting the Access Code.*

COPYRIGHT: *This program must not be used outside the region or country in which it is licensed.*

SYSTEM REQUIREMENTS: *The minimum system requirements for a Windows PC:*

- *Pentium III processor minimum*
- *Win 2000, Server, XP, Vista, 7 or 8 with 2GB RAM and DVD drive*
- *5GB space to install 10GB to run updater (250MB for the Demo)*
- *A monitor with at least 64k colours 1024 x 768 min.*

SUPPORT: *If you experience technical difficulties with this product, check the website at www.atttraining.com/auto.*

At the end of the setup routine, the following notes are shown:

You will now be presented with the option to run support programs. Most are probably already installed on your system so, if not sure, accept the default settings:

- *ATT Regions - sets the system to your country or region*
- *DotNet 3.5 - to run the Updater and Exporter and may already be installed*
- *GreenShot Screen Annotator - a basic version is already installed*
- *Adobe Flash Player and Reader (website) - used for multimedia but may already be on your system*
- *SAP Visual Enterprise Viewer Minimum (website) - this **must** be installed for the 3d feature to work*
- *ATT Updater - checks for updates then starts the main program*

All these support and setup programs are in the main folder or the \InstallFiles folder and can be run later if needed.

When the ATT program first runs, enter your user **Identifier** and **Access Code** exactly as supplied (not needed for the demo version).
